AVAILABILITY & WHEN TO PLANT – Daylilies are available all year round. Daylilies can be planted all year round, but for best results, plant them in autumn, spring, and early summer.

SUBSTITUTES – We have a good supply of listed plants, however, towards the end of the season some varieties may be sold out. Please state if we may substitute or not. We endeavour to match the lilies as closely as possible. If you wish, you may list a number of plants that may be used as substitutes and we will provide these if they are available.

TIME OF DESPATCH – We make every effort to post as soon as possible after receipt of your order. All orders go into a priority listing as we receive them. Orders may possibly take longer in winter due to adverse weather conditions. Please state if you have a deadline or you would like them by a certain date.
